[New Ham name & Call sign]
[address]

Dear [First name],

Congratulations on earning your amateur radio license. I hope you are already enjoying on-air activities. There are many on-air and in-person opportunities that you can now engage in. Two meter FM nets, satellite communications, digital modes, worldwide 10 meter contacts, club suppers and other social gatherings, and more are some fun ways to enjoy amateur radio. This is an awesome hobby and service and we hope you thoroughly enjoy it.

Oftentimes, new hams find it challenging to initially get on the air and successfully make contacts. Whether the issue is figuring out local or regional frequency information, needing help programming a radio, or assistance in acquiring or putting up a quality antenna, our club members can lend a helping hand. Please contact me if you need any help or have questions.

As a newly licensed ham, you are entitled to a free year's membership to the Maine Ham Radio Society. Contact me and I will send you the membership certificate.

Our next club meeting is Saturday, January 6 at my house at 2PM and you are welcome to attend. Our weekly net is held each Thursday at 7PM on the K1HF Marshfield repeater 146.775- PL 192.8. We are looking forward to meeting you on the air and in-person.
